Re: Letter of Recommendation for EcoGreenVision LLC

To Whom It May Concern,

I am writing to express my wholehearted endorsement of EcoGreenVision due to their outstanding contributions in the completion of our recent “Central Plant Upgrade Phase 3 Boiler Addition” project. Having been in the facility management and energy sector for many years, I can confidently say that it is a rarity to encounter a company that showcases such a synthesis of expertise, dedication, and professionalism as EcoGreenVision.

The project fully met our requirements and expectations in terms of functionality, safety and aesthetics. Over the fourteen-month duration of the project, EcoGreenVision's commitment to excellence was consistently evident. They navigated many challenges including the complexities associated with equipment lead-times and budget constraints while maintaining a high-level of professionalism throughout the entire duration of the project.

Mr. Hebat Badiee, in particular, deserves special mention for his instrumental role. His professional engineering expertise was evident throughout the project, and his relentless efforts ensured that our existing plant continued its operations seamlessly during the construction phase. His optimistic and proactive approach to ensuring quality, and his readiness to address any post-installation modifications underscored his dedication and commitment to the success of the project.

EcoGreenVision’s high level of professionalism and cooperative spirit were instrumental in the timely completion of the work. The rapport built between our staff and EcoGreenVision personnel and subcontractors was characterized by mutual respect, clear communication, and a shared goal of achieving excellence.

In conclusion, the success of our \$1.4M Central Plant upgrade project is a testament to EcoGreenVision’s capabilities, expertise, and unwavering dedication to quality. I wholeheartedly recommend them and consider them one of the best in the industry.

Sincerely,

John Spencer

Project Manager
